

## Donald J. MacNeil Opens Campaign With Series of Meetings in Pass Towns

Opening in the Polish Hall on Friday evening his series of meetings, followed by a meeting in the Italian hall on Tuesday evening, Donald J. MacNeil will cover the Rocky Mountain constituency during the next three weeks. In addition to holding public meetings, he is visiting the voters in the rural parts of the constituency, and is being assisted in his campaign by prominent Liberal workers, including J. E. Gillis, his campaign manager, and F. O. McKenna, Liberal candidate for Macleod in the Federal campaign.

A detailed report of the meeting of Friday in the Polish hall follows.

COLEMAN, July 24.—Donald J. MacNeil, Liberal candidate for Rocky Mountain in the provincial elections, opened his campaign with a meeting in the Polish hall, East Coleman.

Alex M. Morrison, president of the constituency Liberal association, was chairman, and other speakers were F. O. McKenna, Liberal candidate for the Federal constituency of Macleod, and J. E. Gillis, well-known Blairmore barrister who is a prominent advocate of Liberalism, who stated that the Liberal party had always stood for fair play and equality of all people in Canada and throughout its history as a political party has been in the forefront of progress and development.

His address dealt with the evils of Communism, and he stated that the ten and a half millions of people in Canada would uphold the liberties and freedom guaranteed them under the British flag. Another menace not less dangerous was Social Credit, and he compared it to the efforts of a gentleman who a number of years ago told the people of Medicine Hat he would produce rain if paid a certain amount.

**U.F.A. Record**  
Of the record of the U.F.A. government, the increase in public debt and the scrapping of a large part of the rural telephone system, were two outstanding examples of the inefficiency of the government which had been in power since 1921. All the facilities and improvements of today, were started by the Liberal government prior to the U.F.A. taking office, and the public debt had been increased from \$50,000,000 to \$150,000,000, despite the cry in 1921 that the Farmers' Government would decrease taxes.

Mr. McKenna congratulated the Liberals of Rocky Mountain in nominating Mr. MacNeil as their candidate, for he was confident he would be a capable representative at Edmonton in the Liberal Government which would control after the coming election.

The platform of Hon. W. R. Howson, K.C., Liberal leader, had been formed after provincial-wide conferences with all classes of people, and was framed to meet present-day conditions. In asking the electors to support Liberalism, he referred to the definition as given by that great Liberal statesman, William Ewart Gladstone: "Liberalism is trust in the people, qualified by prudence."

"Canada since Confederation had been governed by two great parties, Liberals and Conservatives. Other parties had arisen and disappeared. There had been the U.F.O., led by former Premier Drury; then the Progressive party, since dead; then the "Granger Group," later the C.C.F., now the Reconstruction party, Communism and Social Credit, but they, too, would go the way of other defunct parties, while Liberalism would still carry its banner high in the interests of the people throughout the Dominion.

**Liberal Sweep**  
Taxation by the provincial government had been increased from \$8,000,000 in 1921 to \$15,000,000 in 1935. Evidently people throughout the Dominion are deciding that Liberalism is best, as provincial elections showed by the sweeping

Liberal majorities, and Alberta would undoubtedly turn to Liberalism in the forthcoming election.

His advice was: Elect a man in harmony with the government, both at Edmonton and Ottawa, for after the provincial and Federal elections Liberals would be in power through the Dominion.

### Candidate Speaks

Donald J. MacNeil, the candidate, stated that every individual in the Crow's Nest Pass was dependent on the coal industry, for if the mines closed there would be nothing to do but move out. A body of men had told him they thought he was being backed by mining operators. This was not so, but even were it the case, the operators and the workers were all in the same boat when it came to coal orders, and their interests were mutual. Of prime consideration as a representative of Rocky Mountain would be the interests of mine workers.

Reversing influences which would adversely affect the coal industry, he instanced increased taxation within the province as something that would have to be combated. Social Credit would put further taxes on the industry, and in face of competition from other fields the Crow's Nest mines would be forced to close under a policy of Social Credit as outlined by Aberhart, and his just price proposals. Of 227 mines in Alberta, it was claimed 27 could supply the present market needs, so that in face of both local and outside competition, how could a Social Credit government fix a just price? What representation would Rocky Mountain get under Social Credit? That was something for the voters to think over.

The youngest province in Canada by endorsing such a policy would be jumping into suicidal bankruptcy and despair, unions would be destroyed and wages lowered.

**Technical School**  
He was strong for organized effort among the young people, and a vital need was the establishment of a technical school in this area.

Concerning relief camps, he favored paying a fair wage through contractors for the public work now being undertaken, as he felt better value would be received for the money.

He solicited support as a Liberal candidate because as a member of one of the major parties more Social Credit representation could be obtained by a member belonging to no party, for an independent can do nothing from a party standpoint. He appealed for the support of all electors to establish a new deal for the Crow's Nest Pass.

In closing, A. M. Morrison, local president, stated the C.C.F. had backed Mr. MacNeil because they were confident he would rise to something higher than just the member for Rocky Mountain.

Question period brought an enquiry as to old age pensions, which was answered by Mr. McKenna, who stated it was the intention of the Liberal party to reduce the age limit under which pensions are granted.

Mr. MacNeil's campaign meetings will continue steadily throughout the campaign, both on this line and on the line from Seebe to Lake Louise.

## A LETTER FROM ENGLAND— APPRECIATES JOURNAL

Stockport, Eng., July 13, 1935

The Journal:  
I enclose money order for Journal subscription. I find it very pleasurable reading and am glad to get it.—A. Harrison Slade.

Ed. Note.—Mr. Slade was here for several months supervising the erection of the modern coal cleaning plant at McGillivray Co. mine, as representing the English firm of Simon Gaves, Limited, well-known engineering firm.

## FAREWELL TO WELL-KNOWN MICHEL PEOPLE

Mr. and Mrs. H. A. LeRoy, for 18 years residents of Michel, left on Monday for Penitence, B.C., where Mr. LeRoy purchased a hardware business long established there.

He has been manager of the large departmental store of Trites-Wood Co. Ltd. in Michel, and in addition to his capable management of this business

## Widespread Dog Poisoning Baffles Police

The dog poisoner got in his deadly work on Saturday, when five dogs were reported poisoned, including two spaniels owned by Dr. Borden. One dog, a harmless little terrier, owned by Mr. Hulbert, accompanied him down town and he was shocked when it came running to him and dropped dead at his feet. Enquiries were made by Constable Antel to find if poison was purchased locally, but no clue was found to help in identifying the person guilty of this dastardly work.

Over 20 dogs have been poisoned in recent weeks, and in nearly every case they are dogs carrying license tags. Dr. Lillie's favorite Boston terrier was among them. The only theory advanced for this wholesale killing is that someone with a mania for poisoning is guilty, as the deaths indicate that strychnine is being used.

has taken a very active part in local affairs. He has served the Anglican church faithfully, undertaking a great share of the responsibility and financing of the complete renovation of the church a few years ago, making it the finest among the small towns of the interior of British Columbia. Mrs. LeRoy during her entire residence in Michel has faithfully filled the duties of organist, and was in her usual place on Sunday last, when the service took the nature of a farewell.

Their daughter, Miss Florence LeRoy, will spend the remainder of the summer holidays at Penitence and Ymir, and will resume her duties in Michel school on its re-opening in September.

Mr. and Mrs. LeRoy were the recipients of many tokens of affection and goodwill from the church and fraternal societies, as Mr. LeRoy has been active in the Knights of Pythias and also a past master of Fernie Masonic Lodge.

## In the Realm of Sport— Footballers Win, Baseball- ers Lose, Makin's Bird Wins

### COLEMAN GAINS DECISIVE WIN OVER COAL CREEK, 4-1.

Showing a sharp reversal of form, Coleman outplayed Coal Creek to win a 4-1 victory and chalk up their second win of the season. Coleman's play was favored by short, snappy passing which caused Coal Creek trouble from the start, and which was practically responsible for all their goals.

Opening exchanges were fairly even, Coleman making the most dangerous move on goal after several minutes of play, when they succeeded in drawing Ford out of goal, only to send the ball over the bar. Coleman came right back with a determined

raid on Sopko, only to have the play spoiled by Ball who shot over the bar. Coal Creek opened the scoring when Simpson shot and Watson, in his efforts to clear, scored. Half a minute later Coal Creek were unlucky not to score again when they took the ball from cent'f field and went in on Ford, only pure luck saving the Coleman goal. Coleman continued to press and two good chances were spoiled by erratic shooting. Ball put the teams on level terms when he sent in a grounder which easily beat Sopko. Coleman were most unlucky a few minutes later, when they had about half a dozen shots at goal, but the Coleman players seemed only to be able to hit the ball with their shoulders or knees, resulting in the ball being cleared and a splendid opportunity to score was lost.

The second half saw Coleman have a decided advantage in play and add three more goals to their total. Ball put Coleman ahead in the second half when he received a nice pass from Hulme. Joyce, ever dangerous, scored

number three when he added more pep to Moore's shot, which was headed for goal. Coal Creek's play seemed to slacken a little when Coleman took such a commanding lead and only made occasional raids on Ford. Brown finished the scoring when he added number four.

Coleman—Ford, J. Fraser, Watson, W. Fraser, Griffith, Hastings, Hulme, Moore, Joyce, Ball, Brown.

Coal Creek—Sopko, Ferguson, McNay, Smith, Ceine, Rowe, Haverton, Johnson, Atkinson, Simpson, Milburn.

### GRAND PERFORMANCE BY CHAS. MAKIN'S BIRD

The first bird to return to Coleman on Sunday from a flight of pigeons of Pass clubs was that of Charles Makin, a flight of over 600 miles from Peace River country. Details of the distance, and time, have not been turned in to The Journal, but it is reported that Makin's bird will likely win the championship cup for the Pass clubs.

## Agriculture In School

An almost perennial subject of discussion is the school curriculum, what it should and what it should not contain. Many there are who contend that the present-day curriculum in most countries is over-loaded with subjects and contain much that should not be there. There are others, including numerous organizations, who are constantly demanding that or that new subject be added. For example, there are those who strongly advocate the teaching of temperance, not so much in the wider meaning of that term, but in direct relation to the use of intoxicants. Others insist that religion should be taught, while others again object even to recitation of the Lord's Prayer or the Ten Commandments. Still others call for the teaching of co-operation, the meaning and use of money, while the number of so-called social subjects and problems which different groups insist should be included in the curriculum are almost beyond calculation.

The real difficulty seems to lie in the opposing views held as to what is education, and what is the function of the school in providing it to the youth of the land. Is it the main function of the school to impart information, or is it to develop and train the mind and intellectual powers of the student as to equip him or her for the battle of life irrespective of the sphere in which they may live or the particular activity in which they may be engaged? If the former, then a very extensive curriculum would be necessary to cater to all classes of students; if the latter, a fairly short and condensed curriculum might serve all.

There is one subject, however, apart from the rudimentary subjects such as reading, writing, arithmetic, geography, history, composition, etc., which it has been generally recognized should, to the full extent possible, be included in our school courses, and especially so in the western provinces of Canada, and that is, agriculture. Addressing the recent annual convention of the Canadian Society of Technical Agriculturists assembled at Edmonton, Dr. R. C. Wallace, president of the University of Alberta, discussed this particular aspect of present-day curricula in the schools. Having stated that a good deal of thought has been given in past years to the kind of education in agriculture which can best be introduced into the school curriculum, Dr. Wallace said that it had to be frankly admitted that relatively little success had attended the efforts of those who are concerned with school education in the teaching of agriculture; that the formal agriculture of Grade IX and X, of the high school had on the whole not achieved what was expected of it; and that the school garden, so enthusiastically proclaimed thirty years ago, cannot be seen in Western Canada to-day.

While stating that it would necessitate going too far afield to discuss all the underlying difficulties—lack of trained teachers, discontinuity of school life during the growing season, etc.—Dr. Wallace said it had been learned that in public and high school it was science and not the art of a vocation that could be taught successfully. For that reason he was of opinion that successful work in agriculture in the public and high schools will come incidentally to the study of natural science. If the applications of the principles of science were continuously made in plant and animal processes, in weather, here, and in soil processes, interest in agriculture and in agricultural procedure would grow naturally out of the underlying scientific principles which have universal application; and the teacher would not be placed in the compromising position of posing, unwillingly, as an expert in a field where he or she was not accepted. That would be, he felt, the emphasis of the future.

On the other hand, Dr. Wallace pointed out, there had been real success in boys' and girls' club work, and in school fairs in which agricultural projects had played their part, mainly because the activities were extra-curricular and conducted in the realistic atmosphere of the farm with the help of trained district agriculturists. In so far as these projects were honestly carried out by the young people themselves, they were the soundest accomplishment which had yet been achieved in the vocational activity in agriculture of school-age boys and girls. The unfortunate fact was that this system, as yet, did not reach all schools and school children in the rural districts.

These observations by Dr. Wallace would seem to merit the serious consideration, not alone of Provincial departments of education and agriculture, but of the parents of farm boys and girls who are themselves the trustees of rural schools and directors of agricultural societies. Dr. Wallace places stress on those scientific truths which are fundamental, which must be recognized and obeyed if success is to be achieved. These can be learned in school through the natural science course, even though such course may not be distinctly labelled agriculture. Successful agriculture cannot be learned wholly from a book, or through a study course, any more than can carpentering or any other vocation. But if pupils are sent out from the schools well grounded in fundamentals, made acquainted with the immutability of Nature's laws, with intellects trained to observation, to the detection of the true from the false, imbued with initiative and ambition, they will be primarily equipped for a career in agriculture or in any profession they may choose.

### Flying Fish

Flying fish do not fly. They do not flap their "wings," but merely glide through the air. After getting up speed in the water, the fish takes to the air, and wind current and momentum do the rest. Considerable speed is attained and a distance of 500 feet is often covered by these fish.

### Heard It Anyway

Although he sat only a few hundred feet from a bandstand, a visitor at a musical festival in Ontario, heard the musicians from a distance of more than 500 miles. Unable to hear the band concert from where he was sitting, the man turned on his car radio and picked up the program from Chicago.

## Likes Life In The Arctic

Quebec Girl Spends Two Years In The North, And Is Going Back Again

Cities have no attraction for Marie Onrat, 20-year-old Gaspé girl. She found city life "empty" when she visited Montreal after two years at Cameron Bay, a mining settlement on Great Bear Lake, near the Arctic circle.

Marie spent a few days with her sister at Montreal, then left for her home in Gaspé. Late in the summer she expects to marry a young mining engineer, a graduate of Queen's, now in the Athabasca district, and return to the north to live.

In the summer of 1933 Marie, then 18 and fresh from the sheltered life of a convent, set out from Gaspé for Cameron Bay to visit her brother whom she had not seen for eight years. Travelling by rail to Peace River she joined a party taking tin supplies. Then began a hazardous journey by boat through the Peace river, Lake Athabasca, Slave river, Great Slave Lake and the Mackenzie and Great Bear rivers.

When the party reached Fort Franklin, 250 miles from their destination, Sept. 1, the water was freezing fast, and there was no hope of navigating Great Bear Lake that season. A plane was chartered to complete the trip, and Marie had her first experience of flying.

Trips by airplane to visit silver and pitchblende mines in the vicinity were among her later experiences. It was some time, however, before she was permitted to go down into the mines. The miners were superstitious about women in the workings.

At Cameron Bay, where Marie was one of eight white women, she had plenty of time to observe the life and customs of the Indians and Eskimos. She preferred life latter, she said, because they were cleaner in their habits than the Indians.

Wives among the Eskimos may be bartered just as are articles of commerce. Marie told of one occasion when an Eskimo offered his wife for a fine rifle which he coveted. Stealing another man's wife, however, is a serious crime, for which, in the Eskimo idea of justice, death is the fit punishment.

## Gulls Fond Of Cherries

Have Their Own Method Of Securing The Fruit

A remarkable case of birds meeting a new situation by a change in their characteristic behavior has just been reported to the U.S. Biological Survey. The birds are the gulls at Salt Lake Valley of Utah. They are fond of cherries. Great cherry orchards have sprung up through the territory in the last few decades. Now the gull with its clumsy webbed feet, cannot perch on the branches and help itself to cherries like the robin. It must wait for the fruit to fall which doesn't happen in the great commercial orchards. So the gulls have learned to hover over the trees, beat down the fruit with their wings, then fly to the ground and feast on their harvest. They also have been observed in the tops of the cherry trees supporting themselves with outspread wings and devouring all the fruit within reach.

The new food habit says Clarence Cottam, food-habits expert of the Biological Survey, seems to have developed as a result of a locally increased gull population and the consequent greater competition for the limited supply of usual foods.

## Cheered Wrong Man

Lloyd George has a "double" in James Gray, a magistrate in Glasgow, Scotland. This the former premier learned when he recently appeared before an audience of 3,000 in Glasgow to tell about his New Deal proposals. Gray arrived at the hall first, was mistaken for Lloyd George, and received round and round of cheers. When Lloyd George arrived much of the lung power had been spent.

## The Lunar Eclipse

A lunar eclipse is caused by the direct alignment of the sun, earth and moon, with the moon passing through the umbral cone, stretching about 860,000 miles into space. The long duration of the last eclipse—1 hour 40 minutes and 18 seconds—is caused by the moon's passing through a thick portion of the cone, approximately 226,000 miles away from the earth.

**NATURE'S MINERAL SALTS**

Quizzes the system—purifies the blood. Nothing better for relief of Constipation, Rheumatism, Gout, etc. At all Drug Stores and Grocers.

**SASKASAL**

## South Africa Celebrates

New British Dominion Was Formed 25 Years Ago

In the hectic period of the King's silver jubilee another has been overlooked, that of the Union of South Africa. It was in the summer of 1910 that the former Boer republics of the Transvaal and the Orange Free State united with "The Cape" and Natal to form another British dominion overseas.

The Boer War had ended some nine years previously, and thanks to the vision, the generous trust of Sir Henry Campbell-Bannerman, Liberal prime minister, the Dutch people were granted a free constitution within the British Empire instead of being treated as a conquered nation. Instead of their independence being taken from them they were given greater freedom than they even had under old "Oom" Paul Kruger.

There were, and probably are still among the older Afrikaners, a few recalcitrants, but the great majority are, if not ardent Britishers, South Africans first and Britishers next—which is about the situation in Canada—Canadians first, then loyal Britishers. Their loyalty was put to a severe test four years after Union when the Great War broke out and Germany in South-West Africa attempted to foment an anti-British rising. A small number did make themselves troublesome, but Boer and British combined to crush the German forces and soon put an end to Germanism in South Africa.

There is no sturdier Britisher in the Empire than the former Boer general, Jan Smuts, who has one of the finest minds in the world, and General Hertzog, the prime minister, has also become a firm friend of Britain. South Africa has a white population of about two millions, 65 per cent Dutch and 40 per cent British. The country is very prosperous chiefly owing to its vast gold belt, and it can look forward to the future with confidence.—St. Thomas Times-Journal.

## Has Lived On Farm

Canada's Second Woman Senator Eight Years In Saskatchewan

Canada's new woman senator knows, from first hand, of life on a Saskatchewan farm. She is Mrs. Howard Fallis, and she was recently appointed to the senate.

Mrs. Fallis, in the days gone by, once lived for eight years on a farm in Saskatchewan, according to word from the east.

An eloquent and public spirited wife of a Peterborough, Ontario, farmer, Mrs. Fallis holds the distinction of being the second woman member of the Canadian senate. She is the first of her sex to hold a seat in Canada's parliament, and the only woman on the government side of the red chamber.

The name of Mrs. Iva Campbell Fallis appeared among the list of 10 senators named by Prime Minister R. B. Bennett. She combines the ability of performing most of the heavy duties of farm life with that of an eloquent platform speaker.

In February, 1930, shortly after the judicial committee of the privy council had decided in Canada women were "persons" and entitled to all the prerogatives enjoyed by men in respect to government, the prime minister, Mr. L. Mackenzie King, summoned Mrs. Cairine Wilson, of Ottawa, to the senate. She was the first woman senator, and the second woman to become a member of Canada's parliament.

Long before that, in 1921, Miss Agnes MacPhail, a Grey county farmer's daughter and school teacher, was elected to the House of Commons for Southeast Grey, Ont. She was the first of her sex to take a seat in the Dominion parliament and has been returned at every general election since.

## Damage Has Been Repaired

Last Evidence Of Zeppelins Have Disappeared From London

Last visible evidence of the havoc wrought on London and suburbs by World War Zeppelins has disappeared. A waste block near Ely-place, in Camberwell, where three houses were blown to pieces in a 1917 air raid, has been cleared for a row of modern buildings. It was supposed to be the last remaining ruin of any consequence. The base of Cleopatra's Needle on Victoria Embankment, only a few blocks from the Houses of Parliament is heavily pockmarked.

To rub anything through a sieve, always use a wooden spoon in preference to a metal one.

A hick town is where most of the big shots in the city have made good came from.

## FASHION FANCIES

**303**

SUCH CHILDLIKE CHIC—EASY TO WEAR—SO SIMPLE TO MAKE AND AT MODERATE COST

By Ellen Worth

Here's a darling little coat and hat ensemble for tiny tots, so cozy to wear—and smart. The coat buttons snugly at the neck, and being double breasted, affords ample chest protection. In soft Copenhagen diagonal worsted was this model with hat to match. It was lined with a wool silk crepe mixture.

For more severe weather, a lovely idea is to use a quilted effect woolly backed silk. This is warmer than an ordinary lining and does away with the necessity of using an interlining. Style No. 303 is designed for sizes 1, 2, 3 and 4 years. Size 4 requires 1 1/2 yards of 54-inch material for hat and coat with 1 1/2 yards of 35-inch lining and 3/4 yard of 12-inch interlining for hat. Pattern includes the hat and coat.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg. Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Returns of the production of processed cheese in Canada were collected by the Dominion Bureau of Statistics for the first time in 1924. Total production in that year amounted to 16,893,283 pounds. Since 1925, when production has declined, dropping to 10,635,024 pounds in 1933. Production in 1934 amounted to 11,996,348 pounds, an increase over 1933 of 1,361,324 pounds, or 13 per cent.

## Looking For Profit

Hendrick Willem Van Loon, noted Dutch-American historian and traveler, who recently commenced a radio program from New York, as a boy of 11 in Rotterdam spent three days watching a statue of Erasmus to see if the bronze figure really did turn a page of his book every hour, as the legend said.

Suitor—And where is your sister, Jimmy?

Jimmy—She just ran upstairs to change rings when she saw you coming.

## Health Of The World

Population Of Most Countries Retains Good Health During Years Of Depression

According to the data supplied by the League of Nations Year Book, it looks as though mankind not only could take the depression, but waxes healthy under its vicissitudes. The death rate in all except three of the thirty countries reporting was less than the average in the prosperous five years 1926 to 1930. The birth rate average also fell, rising slightly in the last year in five of the countries, namely, Germany, Great Britain, Ireland, Poland and Denmark. Germany has a long lead in this regard, her population increasing 7.1 per 1,000, twice as fast as in 1933, and seven times faster than that of France, and more than twice as fast as that of Great Britain, where it was 3.3 last year. United States for 1933 was 5.7.

The League book does not touch upon the cases of mental illness, but a study made by the United States National Committee for Mental Disease and the American Psychiatric Association, asserts that mental ailments have shown no increase since the depression, a finding that is contrary to the general impression—Winnipeg Free Press.

## Completes Long Trip

Dutch Submarine Travels From Holland To West Indies

The most ambitious trip ever undertaken in any submarine ended recently when The Netherlands Navy's K-15 arrived at Amsterdam from Surabaya, East Indies, having left Helder, Holland, on November 14 last, covering a distance of more than 25,000 miles.

The submarine, under her own power and without an escort, visited five continents. The trip included fifteen, twenty and twenty-five day stretches without a break. The submarine dived 230 times, remaining under water for 204 hours. The crew of 135 men was under Commander G. E. Heterzby, also aboard being Professor Felix A. Vening, of Utrecht University, charged with scientific observations. The latter made the deepest sounding ever made in the Atlantic, namely 6,700 metres between Dakar and Pernambuco.

The stockyards at Williams Lake, B.C., lie in the centre of a miniature empire, with the Cariboo country to the east and the Chilcotin country to the west. An idea of the size of this territory may be gauged from the fact that it takes three weeks to drive cattle to the stockyards from the more remote ranches, while the bulk of the cattle which comes from the west of the Chilcotin river requires ten days to take the trip.

## HORSES WORK BETTER

When freed from saddle bolts, collar, bridle, blinkers, collar, etc., by Minard's Liniment. Keeping a bottle of Minard's in the stable as well as in the house saves Vet's and Doctor's fees.

**MINARD'S**

"KING OF PAIN" LINIMENT

# Construction Of New Battle Fleet Planned By British Admiralty

London.—Great Britain plans to build almost a complete new battle fleet costing \$750,000,000, by 1942, the Daily Herald said in an article which it claimed revealed a secret seven-year plan developed by the admiralty.

Despite a statement in the House of Commons by Sir Bolton Eyres-Monsell, first lord of the admiralty, declaring publication of the program would be against the interests of the public and the peace of the world, the newspaper published what it described as "the admiralty's famous 'hush-hush' plan which already has been communicated to the admiralties of the United States, France, Germany, Italy and Japan."

The new schedule, the newspaper announced, calls for the construction of 12 new capital ships, and 33 cruisers.

The latter item, it was said, fulfilled the dictum of Admiral Jellicoe at the Geneva conference of 1922 when he asserted 70 cruisers were "the absolute requirement" for Britain to remain independent regardless of the strength of other powers.

In addition, the newspaper stated, there will be 63 new flotilla leader-destroyers, 21 new submarines and three new aircraft carriers.

## The New India

Will Soon Have Self-Government With Safeguards

London.—The House of Lords without division gave third reading to the India bill, extending a measure of self-government to India, and it was returned to the House of Commons for minor amendments.

The bill was passed through commons previously, after laborious discussion, and is expected to be ready for proclamation before the end of the year. Under its terms the new India will have self-government with safeguards, or reservation to the governor-general of final decision in matters of national order, defence, finance, protection of minorities and the like.

## Spending Huge Sum

Hitler's Bill For Arms Said To Be \$240,000,000 Monthly

Berlin.—An unofficial calculation based on best available private figures indicated Adolf Hitler's monthly expenditures to rearm the reich averages about \$200,000,000 marks (about \$240,000,000). (The German reichsmark is currently quoted at just over 40 cents, although transactions within Germany are in blocked marks which cannot be taken from the country and hence are not quoted on exchanges.)

A secret debt of about 17,000,000,000 marks has been piled up, financial circles close to the government admit, making the total reich debt about 30,000,000,000 marks.

## Going To Russia

London.—Miss Cora Hind, Winnipeg wheat expert, left here for the Soviet Union where she will inspect the wheat-growing areas. Miss Hind's Canadian estimates are regarded as true market barometers in all grain markets.

# Many Visitors Attend Celebration Which Recalled Early Days

Wakaw, Sask.—Fifty years after the Riel rebellion, relatives of Louis Riel, rebel leader, who was hanged at Regina, for the part he played in skirmishes in Saskatchewan, Indiana and Meila, together with white men, who fought under General Middleton, met at Batoche, where Riel staged his last stand. More than 1,000 visitors attended the fiftieth anniversary celebration and sports day, not forgetting to attend special masses sung in the Roman Catholic church.

Proceedings for the day were opened with high mass, said in the Batoche Catholic church, by Father Robert and by Father Boucher, of St. Louis. In the church grounds stands a monument erected to the memory of those who fell in the four-day battle waged at Batoche in 1885.

Buffalo meat, supplied by the Dominion government, was the fare

## Issue Of Peace And War

League Of Nations Must Act On Ethiopian Question

London.—Britain and France at last have agreed the special council meeting of the League of Nations must get down to brass tacks on the issue of peace or war between Italy and Ethiopia.

The issue affects the political independence of a state that is a member of the league. Neither in conversations with British representatives nor in official despatches has Mussolini yet definitely formulated the nature of his demands on Ethiopia. But from semi-official declarations it is taken for granted that he wants political control over either part or the whole of Ethiopia.

Under article 12 of the covenant, it is argued, Italy is bound to refer to the dispute to the league. The British hold the council should go ahead with the merits of the dispute whether Italy objects or not, and that the council should not seek by some technicality to divert itself of responsibility.

This was stressed by Sir Samuel Hoare, foreign secretary, when he informed the House of Commons the forthcoming league council session should take definite action in the dispute, adding: "The question of actions to be taken in any such event is a matter to be determined in the light of the particular circumstances such as the provisions of the covenant, and I do not consider a declaration in general unspecified terms would serve any useful purpose." He did tell questioners, however, "His Majesty's government will always be ready to co-operate with the United States government in seeking to preserve peace."

## Expense Survey

Would Investigate The Whole Field Of Governmental Expenditures

Saint John, N.B.—Appointment of a royal commission to survey the whole field of governmental expenditures "for the purpose of indicating where and how such expenditures might be curtailed" was urged here by A. O. Dawson, Montreal, president of the Canadian Chamber of Commerce, as he spoke at a luncheon sponsored by the Saint John Board of Trade.

"Effectiveness of the drive for economy is illustrated in the fact that a large number of municipalities, especially in western Canada, have actually put their budgets in balance, that the controllable expenditures of the Dominion were reduced some \$1 million dollars during the past three years, 1931-1934, and that there has been a net decrease in provincial expenditures of some 74 million dollars during 1933-34, compared with a net increase of some 29 million dollars during the preceding year," Mr. Dawson said.

## Separate Treaty

Tokyo.—Japan is willing to make a separate naval treaty with Great Britain as Germany did, and believes it might be arranged, a naval office spokesman intimated in an interview with Havas.

W. A. Boucher, reeve of St. Louis municipality and a director of the Saskatchewan Association of Rural Municipalities, was the main speaker. After welcoming delegates from distant points, he told of the early history of Batoche; how, in 1875, the settlement was formed, following the founding of a Roman Catholic church parish under Father Moulin. At Batoche, the speaker stated, the first school in the North West Territories was built. To-day, the school is known as School District No. 1.

The speaker traced the happenings during the rebellion, blaming the misunderstanding of the situation. After the rebellion, Batoche municipality had developed into one of the most quiet and prosperous ones of the province.

## Floods In China

Red Cross Has Picked Up \$6,000 Bodies Of Victims Drowned

Shanghai.—The Hankow Red Cross Society announced it had picked up 30,000 bodies of persons drowned in the present floods along the Han and Yangtze rivers near Hankow alone and reports from other points indicated a far greater loss of life.

While central China turned to the task of counting its dead, piling up by the tens of thousands along the banks of rivers from which flood waters were receding, the northern provinces continued to battle the floods of the Yellow river.

The latter, crashing barrier after barrier to swallow immense new areas of fertile farmlands, has already blanketed more than 10,000 square miles of the Shantung countryside. Governor Han Fu Chin of Shantung sent an urgent telegram to Nanking reporting nearly 5,000,000 of his people homeless. The neighboring provinces of Hopei, Honan and Shensi are also seriously hit. Government authorities and relief agencies said the Yangtze's devastation of the five provinces affected is so immense that it still is impossible to estimate the total losses.

## Plan Is Approved

Equalization Scheme Will Help To Maintain Cheese Industry

Ottawa.—Designed to assist in the maintenance of the cheese branch of the dairy industry in the Dominion, the dairy products marketing equalization scheme has just been officially approved.

The scheme also aims to stabilize the price of milk entering into the manufacture of cheese at a somewhat higher level than can be realized from the proceeds of the sale of cheese. It will thereby equalize, to some extent, the returns from the marketing of dairy products.

A fund has been provided by parliament out of which it is intended payments on the basis of the quantity of cheese manufactured will be made.

## Plan To Start Shortly

Borstal System Will Be In Operation Within Month

Ottawa.—Application to youthful offenders in Canadian penitentiaries of the Borstal system probably will be in operation in another month.

Necessary changes for their segregation are understood to be under way. The old buildings at Kingston penitentiary which formerly housed women convicts is expected to be utilized. —See St. Vincent de Paul, the new Laval penitentiary likely will be used.

The system applies to those under 21 years of age and is a combination of mental, moral, physical and industrial training.

## Veteran Printer Dead

Montreal.—Isaac Glemton, 79, one of the veteran printers of Montreal, well known here and in western Canada, died suddenly last week. He went to western Canada 25 years ago and was resident at the Pas, Man., until his return to this city.

## THE KING REVIEWS HIS AIR FORCE

This picture shows His Majesty the King wearing, for the first time, the uniform of an air marshal as he reviews the Guard of Honour at Mildenhall where he inspected the greatest gathering of British fighting planes in the history of aviation. More than 300 types of aircraft took part in the great jubilee review and later saw their Majesties at Duxford.

## RETURNS

Here is a picture of the Rev. Charles W. Gordon of Winnipeg, better known as Ralph Connor, as he returned to Canada on the "Niagara" from a visit to the Antipodes.

## Author Ran Into Difficulty

Found Ride Over Alps On Elephant Required Cash

Rome.—Richard Halliburton, American traveller and author who is trying to emulate Hannibal in "conquering Italy" by crossing the Alps on an elephant, struck a snag when Italian authorities at the frontier point of Gran San Bernardo told him he would have to pay a deposit of 50 per cent. of the elephant's value.

Halliburton was forced to return to Lucerne, Switzerland, minus the elephant, to obtain funds for the customs deposit—something Hannibal did not have to worry about. Halliburton returned with the money, but he still had another modern obstacle to overcome in his journey to Rome—a veterinarian must pass on the elephant's sanitary qualifications before it enters Italy.

## Expect Big Reduction

Rust May Cut United States Crop In Half

St. Paul, Minn.—Black rust shrouded the spring wheat belt so darkly observers forecast a 50 per cent. reduction in the domestic crop of once plentiful promise.

Increasing violence in the rust attack, with continued hot, humid weather, led competent authority to cut in half the originally estimated yield of 273,000,000 bushels from the great grain belt of the United States.

## More On Voters' List

Ottawa.—Voters' lists for the federal election will be completed August 15, it was announced by Col. John Thompson, Dominion franchise commissioner. Following the recent revision, they are being printed at the government bureau at the rate of 10 readings daily. The lists will show 6,000,000 men and women eligible to vote, an increase of 250,000 over the basic lists last year.

# Bureau Of Statistics Reports Improvement In All Canadian Areas

## Three Killed By Explosion

Experts Were Clearing Danger Spot At Manufacturing Plant

Waverley, N.S.—An explosion of nitro-glycerine near a former manufacturing plant killed three experts of Canadian Industries Limited, burying them under tons of debris. Of the party of four testing explosives for the company, only Willis Leighton, of Halifax, escaped. Carrying 10 sticks of dynamite in his hand, Leighton was hurled into an old well, where he lay for several minutes in a semi-conscious condition.

Trees and bushes were felled or stripped of their foliage over a wide area, and the blast was heard for miles around Waverley.

The plant, situated on Canadian Industries property, was used for manufacturing explosives during the war.

Belief was expressed that some nitro-glycerine might have run into the hollow between the buildings and the lake and remained there during the years since manufacturing operations ceased.

## Guests At Exhibition

Saskatoon Entertained Riel Veterans And Indians For Day

Saskatoon.—Representatives of both sides of the last great historic struggle between the white and the red men, with western Canada as the prize, stood side by side on the grandstand platform at Saskatoon's Industrial Exhibition to be officially welcomed and introduced by Mayor Pinder to the large assemblage in attendance.

It was just a half century ago that these veterans of the rebellion of '85 went to battle on Saskatchewan soil. The mere handful of the old guard now left were the guests of the exhibition management for the entire day. The event took the form of a reunion, some coming from Regina, Brandon and other points in the west, including Victoria, B.C.

## Adheres To Gold Basis

Queen Of Netherlands Thinks Standard Should Be Maintained

The Hague, The Netherlands.—Gold fled from The Netherlands to France and the United States as Premier-designate D. P. Aalberse, Catholic leader, withheld announcement of his financial policy.

Although informed quarters believed Aalberse and the government he was trying to form would continue efforts of his predecessor, Hendry Colijn, to save the guilder from devaluation, the franc and the dollar still were moving above the gold export point.

Queen Wilhelmina was believed strongly convinced the gold standard should be maintained.

## Serious Drouth In Hungary

Budapest.—Heavy losses have been suffered by Hungarian farmers in a drouth which has continued nearly two months, reports indicated. Only abundant rainfall soon can save the crops, it was said. Losses due to the dry spell and early frosts and hail storms total nearly \$20,000,000.

## Higher Duty On Jap Goods

Canada Has Increased Tax On Imports From Orient

Ottawa.—Canada has hit back at Japan's edict imposing a 50 cent surtax on Canadian goods going into the Oriental kingdom. Effective on and after Aug. 5, all imports entering this country from Japan will pay a duty of 33 1/3 per cent. ad valorem, addition to duties now levied.

The effective date in the case of each country conforms: so that goods not in transit either to or from Japan are exempt from the imposts the two nations have clapped on. Intimation was the next move in the trade situation was up to Japan.

There is a difference between the two surtaxes. Japan applies her extra 50 per cent. to imports from this country including lumber, pulp and paper; but excludes what she needs, such as nickel, lead and zinc. Canada's surtax applies to all imports from the Oriental kingdom.

In comparison with the preceding month all five economic areas showed improvement, with Ontario and the prairie provinces showing the largest advances.

Considerable expansion was shown in the prairie provinces when 1,348 employers showed 121,438 workers compared with 116,276 in the preceding month. Improvement was noted in railway and highway construction and also in transportation, communications, mining and manufacturing, with logging and building being somewhat slacker.

## May Visit Calgary

Calgary.—Thovalud Stauning, premier of Denmark, who arrives at New York, Aug. 24, may come to Calgary to see his son, at present engaged in farming at Penhold, Alta. it was learned. The trip would be made following an official visit to Washington.

# Italian Crowds Voice Their Approval Of African War Program

Rome.—Rome rocked to the rhythm of "Ethiopia for us" shouted from 100,000 Fascist throats as one of the greatest demonstrations in the capital's history gathered at Colonna and Venezia squares to roar approval of Benito Mussolini's African program.

A particularly frenzied shout swept through the enormous crowd when the Fascist secretary for Rome, Orazio Orazi, assured the crowd Italy would "be ready for war against blacks and yellows and, if necessary, blondes."

Previously the demonstrators had shouted their opposition to Ethiopia and her alleged champion, Japan. The crowd took Orazi's mention of "blondes" to refer to Britain, also

accused by Italians of intervening in the dispute.

Fearing the demonstration would get out of hand, authorities threw heavy guards about the three foreign legations. No untoward incident was reported.

Washington.—A prediction was made by Norman Davis, United States ambassador to Rome, that the League of Nations would bring Italy and Ethiopia to a peaceful settlement of their threatened war.

"It appears of me," Davis said, "that France is not going to break with the league and with England at the same time just to support Italy in its present position. The league was not called into session just for a pleasant gathering."

## NOTES AND COMMENTS

**COAL IS KING!** The majority of electors in Rocky Mountain constituency depend on it for their livelihood. It receives scant consideration in the provincial legislature though furnishing much revenue to the province; second only, we believe, to agriculture.

but the old-line parties have continued to administer Canada's affairs and will continue to do so. The reason is that the majority want responsible government.

Under Social Credit, "Someone has to pay," avers the Economic Safety League. Owing to the fact that farmers are being told that they will be the people as a class to suffer taxation to a greater extent than others, there is considerable waning of enthusiasm for the Utopian proposals of the Social Credit leader.

Hon. Harry Stevens is angling for Alberta votes by stating he would favor a great deal of the transportation cost being absorbed by the government. If the Crown's Nest, mines and other Alberta mines were to enjoy a greatly increased tonnage, that would provide a real dividend to many instead of just the shadow.

Just stop and think! Men fuss and struggle and sometimes almost froth at the mouth over politics. What does it amount to when you come to the end of the road? You just fade away and in a very short time, if you are just one of the countless millions, you are quickly forgotten. There are very few among the importants whose names are carried from generation to generation. The greatest of them was crucified. It is well to remember it if you are tempted to get an exaggerated opinion of yourself.

All trade union members should see that the rules are observed in their dealings with others. In other words, play the game! Chisellers have been known from time immemorial. Webster's dictionary defines a chiseller as one who drives a sharp bargain, or tries to get the better of another by shrewd deceit, or a cheat. It's not nice to be known as a chiseller.

Judging from the free publicity requests and reams of mimeograph paper used in sending out propaganda of all kinds to weekly newspapers, there is a lot of time and effort being wasted, for it finds its way to the waste paper basket at the first glance. The quicker that people responsible for sending out this stuff realize their effort is in vain as far as getting free publicity is concerned, the more pleased we will be.

THERE HAVE BEEN occasions when the mention of coal in the legislative halls at Edmonton was received with indifference; perhaps with a supercilious smile. The industry never has had aggressive representation for mine workers or operators, whose interests are mutual, as are those of the retail business interests of the mining towns of this constituency.

NOT BEING IN CONTACT with the coal industry and not realizing its importance to the province, the majority of legislators naturally take little cognizance of its problems and efforts to establish wider markets which in turn would increase employment for Alberta mine workers and increase business for all dependent on the industry.

THE CANDIDATURE of Donald J. MacNeill receives support because of his ability to bring before the legislature in forceful style the necessity of greater consideration being given towards development of this all-important natural resource of the province. As our vital interests are in the main our political, no matter to which party we may declare our allegiance, the interests of the majority of Rocky Mountain electorates will best be served by supporting the campaign for D. J. MacNeill's return to the legislature.

The ranting of amateur radio politicians, never heard of till this election, of the evils of the old-line parties, is amusing. They have no record of their own to commend them, and in most cases have been an absolute blank in their respective communities as far as welfare activities are concerned. To listen to their castigation of the old-line parties would lead the uninitiated to believe that the country has been held by the throat and the money filched from the taxpayers' pockets much as a highwayman would treat his captives.

Examine the records. Since Confederation parties have arose and died after a very brief meteoric career,

## THE SALVATION ARMY

Having great times at the Salvation Army. Attendances at the meetings are on the increase. You are heartily invited to attend.

Friday at 7: Special meeting for young people.

Subject—"The Broken Arrow."

Sunday at 3: Sunday School.

Sunday night at 7: Great gospel service; special singing and music.

Everybody welcome.

Lieut. Pierce, who has been away on a few days' furlough to Waterton Lakes, will be here Sunday night.

Coming: Major Acton, pioneer worker of the Salvation Army in the Pass.

## ELECTION NOTES OF INTEREST

Donald J. MacNeill, Liberal candidate, plans on holding a meeting in Banff on August 5, and also holding campaign meetings at other points between Seebe and Lake Louise. Campaign meeting, August 6; Exshaw in the afternoon of August 6.

At time of going to press, no advice has been given of meetings to be held by G. E. Cruickshank, former member and independent candidate for this election.

The "Crag and Canyon", Banff, reported in its last issue that G. E. Cruickshank, independent candidate, and Sam Bannan, returning officer, were there on a visit during the week.

Social Creditors have not announced any meetings for this week, as their candidate, E. A. Duke, of Camrose, has not arranged his schedule for this area.

Sam Bannan, of Blairmore, has been appointed returning officer for Rocky Mountain constituency. R. N. Barnhill is election clerk. Mr. Bannan is also secretary of the Rocky Mountain Conservative Association, but in view of his having been appointed an election official, it is anticipated he will necessarily resign this office.

(Continued from Page One)

### Coleman Lost by One Run

Angelo's baseball team were narrowly defeated Monday evening when they lost to Hillcrest 11-10. Errors were responsible for Coleman's defeat, Hillcrest taking advantage of them to pile up a huge lead only to have Coleman almost draw level in the last frame. Gate and Yagos were on the mound for Coleman with Sonny Richards catching.

### TENNIS NOTES

Coleman tennis club will be represented at the provincial tournament to be held at Calgary next week by Balloch and Shone. Both players have been practicing steadily and are now at the peak of their form and they are expected to show up well in the single events.

The McGillivray Cup tournament is expected to start within the next two weeks now that Creggan has returned from his vacation. The cup is at the present time held by Roughhead who defeated Shone in the final last year.

Mrs. S. Short, who witnessed the Western Canada tennis tournament held at the coast this month, reports on the excellent brand of tennis played at the tournament. Calgary tennis players vacationing at the coast also witnessed the games.

Chick Roughhead decided at the last minute to compete in the provincial tournament and wired his entry in Wednesday evening. He will play in the Men's doubles with Balloch.

## Home Town Folks You Can Depend On

By John Edwin Price

Though my wife plans the finest meals imaginable, says I'm the handsomest man in seven counties and kisses me seventy times seven times before I go to bed at night, yet if she is not loyal to me the rest means nothing.

Though a person boast of the beauties of his home town when he is away from home and argue for patriotism until he is black in the face, yet DOES NOTHING to make his home town better, then his words are worse than sounding brass and clanging cymbals.

On the other hand, you may not be rich or clever or good-looking, yet if you give loyalty to whom loyalty is due your neighbors will overlook a lot and love you just the same.

Folks who are busy planning ways of being loyal to their home town haven't time to spread smut, knock the churches, lodges, clubs or schools, or speak ill of their relatives.

Of course there are a lot of folks who are loyal, but not in our particular way. They are different by nature, their training was different and their experiences incline their interests differently.

Line fifty of your friends up against a mental wall. Look them over as they stand there. In general you class them as dependable folks, loyal to the best interests of the town. Now place next little black and white signs along the top of that wall with one of the following words on each: Church, Lodge, Library, Club, School, Scouts,

Legion, "Y", Health, Beauty, Miscellaneous. Now rearrange the lineup of your friends so they stand under the sign representing their predominant interests. Some express loyalty in so many ways that you will have a large group under Miscellaneous.

We had to include Beauty, for there now is a strong movement to clean up, paint up and rearrange our town with Beauty in mind. The service club in one town is planting lilacs wherever they will grow. In other ways towns are given a personality.

Strong loyalty may be expressed in doing all possible business in one's home town so that business and professional people may have a chance to earn more with which to do more for their towns.

Some folks hesitate to work for the home town for fear their efforts won't be appreciated. It is better to be active in good works though not appreciated than to miss the joy which comes in the consciousness that you have done what you could to make the world a bit better for having lived in it a while.

Christ was practically alone when His crisis came because His heyday followers hadn't absorbed the truth that when put to the test "an ounce of loyalty is worth a pound of cleverness." Home town folks you can depend on seem to have as their life theme song: "Take My Life and Let It Be Lived in Loyalty to Thee."

## MAK ECOLEMAN A CLEAN TOWN!

PAINT is a very important factor in maintaining a good appearance of property. Join in the campaign NOW to improve MAIN STREET and every other street in Coleman by painting your property so that you'll feel proud of it.

The following dealers are co-operating in promoting a "PAINT-UP CAMPAIGN" by listing the following Paints, Varnishes, Brushes and other requirements.

### There is no Time Like the Present to Paint-up Your Home or Store

## Local News

James Moores of Creston and former mayor of Coleman was a visitor in town Tuesday.

Mr. and Mrs. Fred Antrobus and daughter Freda left Sunday on a motor trip to the coast.

Mr. and Mrs. A. Oliva have as their guest Mrs. Oliva's brother, Mr. Iliade, of Philadelphia.

Dave Flynn, former Coleman resident, and who for the past few years has resided at the coast, is the guest of his parents for the next two weeks.

Readers are urged to turn to the display ad. of Hillcrest Miners and Athletic Club carnival to be held Aug. 10 and 12. Further details next week.

The Misses Mary and Margaret Roughhead were Lethbridge visitors last week. Stewart Cowan accompanied them on the return trip and is the guest of Mr. and Mrs. Wm. Roughhead.

R. H. Melville, of Calgary, manager in Southern Alberta for the Confederation Life Assurance Co., was here this week in connection with the special agency work of Mr. Charman, of Calgary, and the local representative, Ernest F. Gare.

A petty thief broke into The Eatery, opposite the Grand Union hotel, last evening, and stole several packets of cigarettes. The front door, newly painted, was smeared by the fingerprints of the thief, so that he may have some tell-tale marks on his clothing.

Mr. Aberhart is reported in the Lethbridge Herald to have stated that his statement at Cardston about establishing a provincial post-office under Social Credit was a joke. Possibly he has his tongue in his cheek and secretly regards the whole thing as an immense joke.

It is regrettable that the hymn "O God Our Help In Ages Past" is used for a purpose which the author never dreamed of and which is grossly travestied. Using it as a political campaign hymn borders on sacrilege, especially in the minds of those who associate it with memories of comfort and solace in times of spiritual distress.

Modern Dry Cleaners, whose opening announcement is in this family journal, are preparing for their opening on Monday. Dell Fraser and George Lounsbury, and Mrs. Fraser, arrived last week and have been busy preparing the premises three doors east of the Grand Union. They aim to give the Pass towns a complete service by calling for and delivering all orders, and readers are urged to give this local firm their orders.

## An Advertisement

in the Local Weekly Newspaper is an evidence of progress and enterprise. It demonstrates—

**First:** That the advertiser is anxious to interest the people in his retail business.

**Second:** That he practices what he preaches in urging people to buy at home.

**Third:** That he realizes the value to the community of a well-printed newspaper which reflects the worthwhile activities of the people.

**Fourth:** That goodwill is that intangible asset which is built up by fair prices, good service and a desire to help in the building up of the place in which he lives

Blank Counter Check Books per dozen \$1.00.

ADVERTISEMENTS of Leading Merchants will be found in this paper.

When the doctor advised the nervous young man to bury himself in his work he did not know that he was a concrete mixer.

That is one disadvantage of a newspaper's errors—all the world may see them; but others may make them and very few if any others are any wiser.

## Alberta Savings Certificates

A Sound Form of Investment

By Issuance of Savings Certificates, the Province of Alberta has for many years afforded opportunity to the public for investment of their savings at attractive interest rates, at the same time assisting the Province in maintaining public services vital to the welfare of the people.

In addition to the usual "Demand" Certificates, available in denominations of \$5 and upwards, the Government in 1932 inaugurated Term Certificates, bearing a fixed rate of interest for stated periods of one, two or three years. Purchasers of these certificates are afforded the same security as on Provincial Bonds. The term certificates are available in various denominations from \$25 up and are not subject to the varying market prices for debentures.

**4 $\frac{1}{2}$ %**

## Local News

Charles Clark a Visitor

Charles Clark, proprietor of the High River Times, was a caller on Wednesday on his return from the coast. Charlie, a South African veteran, and brother of Col. Hugh Clark, of Ottawa, is the only weekly newspaper man who boasts of having the Prince of Wales as a subscriber. His paper has taken prizes in competitions of the C. W. N. A. and is a forceful influence in the community. Mr. Clark established his paper very shortly after his return from the South African war, in the days when Bob Edwards published the Eye Opener, and it has been going strong since, as one of the real worth-while weekly newspapers.

In The Good Old Days

That was when political parties would give newspapers a full page of advertising to help offset part of the expense of publishing reports of their doings. If there were three or four candidates, it was good grist for the newspaper. It was compensation in a slight degree for having to listen to and report meetings lasting far into the night.

What mattered if the candidates' photos in close juxtaposition glared at each other from opposite pages? It interested the people, and put pep into the campaign, so that people really knew there was an election; who the candidates were and what they had to offer.

## Building and Construction

The roadway of Main street is to have the surface sand removed and another coating of the liquid asphalt applied as the finishing touch to the contract. A quantity of asphalt is on hand which will be used for surfacing the roads most used in the town.

Extension of the basement under Central school is proceeding and has given employment to a number of men whereby they have been enabled to work off school taxes.

Many new houses and additions to old houses have been constructed since the opening of spring, in all parts of the town. Building permits constitute a record for many years, though the total amount is not available.

## ANNOUNCEMENT

Cottages and Cabins for rent on beautiful McBein's lake. Boating, Fishing and swimming. It is only 32 miles from Fernie. See Francois Vernon at Raleigh store for full particulars. Rents moderate.

Result-getting advertising is a steady pull—not an occasional jerk.

## WORLD HAPPENINGS BRIEFLY TOLD

Friends of the late Col. T. E. Lawrence — Lawrence of Arabia — announced the death of St. Paul's Cathedral had offered space there for a memorial to him.

Dr. E. Cora Hind, of the Winnipeg Free Press, was the luncheon guest of the directors of the Liverpool Corn Trade Association on July 3 at Liverpool.

Notices inviting all negro men in Montreal aged 21 or over, in good physical condition, to register for service with the forces of Emperor Haile Selassie, of Ethiopia, have been posted throughout Montreal.

A loan of \$500,000 has just been authorized by the Dominion government to the province of Manitoba for re-planting to the city of Winnipeg to meet expenses of the city in connection with 1934 relief projects.

Sweden recently celebrated the 500th anniversary of the Swedish Riksdag or parliament, the first recorded meeting being in 1435. Only the British and Icelandic parliaments are older than Sweden's.

First import of its kind through Montreal, anthracite coal from French Indo-China—a load of 8,000 tons carried in the Norwegian motorship Bonneville—arrived recently to be sold on the Canadian market.

Rear-Admiral Gerald Charles Dickens, a grandson of the famous novelist, was appointed commander-in-chief of the reserve fleet of the royal navy, in succession to Vice-Admiral Astley-Rushton, killed in a motorcar accident.

A crate of used books arrived at the entrance to the London County Jail. Just a bit of reading for the prisoners. The titles included: "A Book of Escapes" by John Buchan, Canada's governor-general designate, and "Bars of Iron," by Ethel M. Dell.

### Returning To Japan

Charming Native Of Korea Spends Three Years Attending Canadian Schools

Sada Nawise, charming native of Korea, is returning to Japan after spending three years in Canada attending Canadian colleges. She plans to take back to her native land methods of western education.

She taught school in Korea, later going to Japan, where she worked with Dr. P. G. Price, evangelist. On his advice she left for Canada, spending two years at Alma college, St. Thomas, Ont., before studying at a training school. She plans to be a religious educationist in Tokyo.

In a Japanese kimono she loves to dance the interpretive dances of her people. She is an accomplished musician.

Miss Nawise is visiting in Edmonton as the guest of Miss Dorothy McBain, with whom she attended United Church Missionary Training College in Toronto last year.

She said no English translation could do justice to Japanese poetry, which was written in two measures, one containing 31 beats, metrically divided, and the other 17. Children, in their earliest lessons, were taught verse, and she wrote her first poem at the age of five.

Japanese women were invading every field—even the police force, and were popular officers, she said.

### Restrictions For Newspapers

Vendors In Peiping, China, Forbidden To Shout Headlines

Deeming that the loud cries of newspaper vendors tended to spread alarm and uneasiness in that already nervous city, the Peiping authorities have issued an order whereby all newspaper vendors are prohibited from shouting the headlines of their papers, but must limit themselves to merely saying the names of their publications.

Another reason for the new ruling is that the newspaper advertise in a particularly loud voice the racy and vulgar stories that appear even to the last detail, in the less reputable papers.

### Fail In Driving Tests

A greater number of women than men motorists have failed to pass the new official driving tests in Great Britain. A special report showing the percentage of the women "ploughed" by the Ministry of Transport examiners since the tests began has just been made public.

### No Test Needed

American paper money will fold five thousand times by actual test, without cracking or breaking. There is no need for any such test in Canada, where it is impossible to hold on to paper money for more than one folding says the Ottawa Citizen.

### Pens And Penmanship

Steel Pen Invented Early In The 19th Century

The change that has come over pens and penmanship, letter-writing and bookkeeping, the whole art of correspondence, in the last half century is an illustration of our development in speed and consequent change of practice. We have gained much, although we have lost something. What we have certainly lost behind us is the wondrous variety of characteristic calligraphy, often difficult to decipher, that was carried by the mails.

The earliest writing instruments were the brush of the Chinese and the Egyptians and the stylus of the Greeks and the Romans. The origin of the quill for writing is uncertain, but it was for many centuries the chief writing instrument, holding its own until the middle of the last century. Fifty or sixty years ago, a judge on the bench might still be seen scratching his notes with a goose quill, and many men, clinging to habit, wrote their correspondence that way.

The steel pen was invented early in the 19th century and took the place of the quill. It made style somewhat more uniform and its use persisted, despite the influence of the typewriter. Many leading men in Canada wrote their letters by hand with a steel pen and that is still considered the ultimate of courtesy in letter-writing. The typographic pen came next, but it has been replaced by the fountain pen, a hard instrument, although it is not possible to display with it the highest art in penmanship or decorative writing.

There are over half a million fountain pens made in Canada in a year, and the factory value of other pens is over \$30,000. Our importations are considerable but the domestic production is far in excess.

This information is taken from reports issued by the General Manufacturers Branch of the Dominion Bureau of Statistics.

### Gardening Favorite Hobby

Biographies Of Women Show It Tops The List

Be she evag so famous, woman apparently still hesitates to tell her age. "American Women" contains biographies of 6,214 women chosen for earned fame. But 2,507—more than one third—declined to tell their age. On other subjects too there was reticence—1,852 did not state politics and 1,171 did not state religion.

The famous woman is mostly unmarried, 99 per cent. to be exact. Teaching and writing ranked all other occupations; gardens topped the hobbies with 988 adherents; walking was the ladylike first choice in recreations and sports with 721 declaring for it. Swimming was second with 592.

### Italy's Wheat-Mixing Law

Has Cut Down Imports Of Grain From Canada

Imports of Canadian wheat into Italy are restricted, not only by relatively high custom duties—over six dollars per 100 kilos—but also by the application of the wheat-mixing law. The latter, as at present effective, compels Italian millers to grind 99 per cent. of both hard and soft Italian wheat, thus leaving only one per cent. foreign wheat in the finished product. In spite of these difficulties, Canada exported 24,512 metric tons of hard, 18,523 metric tons of soft wheat, and 15,594 quintals (220 pounds per quintal) of wheat flour to Italy in 1934.

### Too Much Waiting

Young People Are Not Creating Opportunities As They Should

Students of Canadian history have been impressed of late by the thought that many present difficulties would disappear if young people were prepared to face pioneer conditions and make a way for themselves as earlier generations did in this country. There is too great a tendency to wait for governments or organizations to create favorable opportunities, and too much dependence upon services and conveniences and environment which exists only because of the toll which others performed many years ago.

Mercury is the fastest of all the planets in the solar system and revolves about the sun at approximately 30 miles a second. The earth travels 18 miles a second in its journey around the sun.

There are no new planets left in the world to discover, laments an explorer. We had been wondering why it was so hard to find a fresh spot for a picnic.

### TEN TIMES HIGHER THAN NIAGARA

Della Falls on Vancouver Island, reached by road and trail from Victoria. These falls are 1,580 feet high or exactly ten times higher than Niagara and nearly four times higher than the famous falls on the Victoria Nyanza on the Zambesi in Africa. They are in the heart of Vancouver Island and are reached from Victoria by motor road 138 miles and then 10 miles trail. They are the highest falls on this continent and the second or third highest falls in the world.

### Encouraging Results

Discovery Of Ensol Hopes Treatment May Result In Cancer Control

Dr. H. C. Connell, who has announced discovery of biological products he named "ensols" for treatment of cancer, said he was greatly encouraged over results so far achieved. He has been working steadily on detailed reports for publication in scientific and medical journals, with the assistance of a pathologist. He has also been studying the cause of cancer.

Marked improvement has been shown by patients under Dr. Connell's care, even after 10 days' treatment. Requests for treatment, from as far away as Texas, continue to come in.

Dr. Connell has found injection of the "ensol" solution into the bloodstream arrests cancer growth. He hopes the treatment may prove definitely to control cancer.

### Little Of Both

A school inspector began by putting a few questions to the small girls.

"Now," he said, "if all the good people were white, and all the bad people were black, what color would you be?"

Some of the children said white and others black, but little Gloria, who had remained silent until the others replied, said, "Please, sir, I'd be streaky."

Many stars are hotter than our sun.

### Contracts Unusual Disease

Man's Lungs Fill With Water Which Doctors Must Remove

A strapping young man lies in a hospital bed in Kansas City, Mo., and fights valiantly against an ailment which threatens to drown him as effectively as if he was under 10 feet of water.

The patient, Fred Green, 22, who has contracted an unusual disease known to physicians as acute pulmonary edema. With every rush of blood to his lungs, Green's heart was sending an equal supply of water.

This fluid, formed by a breaking down of the blood itself, remains in the lungs and covers the air spaces where the blood usually is furnished life-giving oxygen.

Although Green is breathing at twice the normal rate of speed, without medical attention his lungs would be filled with water in a short time and he would be drowned.

Physicians were momentarily at a loss to explain his trouble when he fell into a coma after gasping that he couldn't breathe.

For the 27 weeks ended July 4, 1935, the number of hogs graded in Canada was 1,995,292, of which 537,749 were graded alive at stockyards, 1,020,019 alive at packing plants, and 37,524 by carcasses.

A filter which transmits "cold light," virtually without heat, has been developed.

### SUNDAY SCHOOL LESSON

AUGUST 4

JOSEPH (A Religious Reformer)

Golden text: Thou shalt worship the Lord thy God, and him only shalt thou serve. Matthew 4:10.

Lesson: II Kings 22:1 to 23:30. Devotional reading: Deuteronomy 6:4-13.

### Explanations And Comments

The Covenant Made by King Josiah and His People, II Kings 23:1-3. After the finding of the Book of the Law, told of in the chapter preceding our lesson, Josiah, the King of Judah, called a representative assembly to Jerusalem, elders and men of Judah, priests and prophets (Jeremiah, Habakkuk and Zephaniah were living about this time) and the people "both small and great," young and old. After having them listen to the reading aloud of the book, he stood on the platform and covenanted before Jehovah to keep with all his heart God's commandments and testimonies and statutes "his orders and his warnings and his rules" (Moffatt's translation) which they had just heard read, and then he called upon all the assembly "to stand for it," to signify by a rising vote their purpose of keeping the law. "All the people confirmed the compact" (Moffatt's translation).

Josiah's Religious Reforms, II Kings 23:4-20. Very thorough was Josiah in his reform measures. He had the temple purged of every idol and every vessel that had been used for idolatrous worship, removed the idolatrous priests, and destroyed all the idolatrous places and altars in Judah. Not content with this, he had the same thorough work done in the Northern Kingdom, even digging up bones of the priests of Baal and burning them, and the altars of Baal, and having living high priests of Baal slain.

The Passover Kept, II Kings 23:21-23. Second Chronicles 35:1-9 gives greater details about the keeping of this Passover. So notable was Josiah in the Passover in its strict following of the directions laid down in the Book of the Law and in the manner in which he kept it, that the account declares it far exceeded any observed during the days of the Judges or in the reigns of any of the kings either of Israel or Judah. "Formerly the Passover had been a household feast which could be observed anywhere throughout the country (Dt. 16:5); now for the first time the people were obliged to come up to Jerusalem for the purpose of celebrating it."

### Recipes For This Week

(By Betty Barclay)

#### PECAN CHOCOLATE MOUSSE

12 squares unsweetened chocolate  
1/2 cup cold milk  
1/4 cup sugar  
4 egg yolks, slightly beaten  
1 package strawberry-flavored gelatin  
1/4 teaspoon salt  
1/4 teaspoon vanilla  
1/2 cup pecan meats, coarsely cut  
1/2 cup cream, whipped

Add chocolate to milk and heat in double boiler. When chocolate is melted, beat with rotary egg beater until mixture is smooth and blended. Combine sugar and egg yolks; add small amount of chocolate mixture, stirring vigorously; return to double boiler and cook until thickened, stirring constantly. Add gelatin and salt and stir over hot water until gelatin is dissolved. Chill. When slightly thickened, add vanilla and fold in nuts and cream. Turn into individual molds. Chill until firm. Unmold. Serves eight.

#### BLACKBERRY JAM

4 cups (2 lbs.) prepared fruit  
7 cups (3 lbs.) sugar  
1/2 bottle fruit pectin

To prepare fruit, grind about two quarts fully ripe berries or crush completely one layer at a time so that each berry is reduced to a pulp. Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 5 minutes. Remove from fire and stir in bottled fruit pectin. Then stir and skim by turns for just 5 minutes and cool slightly to prevent floating fruit. Pour quickly. Paraffin hot jam at once. Makes about 10 glasses (6 fluid ounces each).

#### Making Use Of Planes

More Than Hundred Kept Busy By Russian Industries

Industry in Soviet Russia is keeping 110 airplanes busy. They serve factories, construction jobs, oil fields and mines, transporting spare parts and carrying experts in emergencies. Planes are widely used by the trusts in geological prospecting and by the power industry to determine points where high-tension overhead lines have been damaged.

Finland holds the honor of the earliest use of handwork as an agency in education.

### Little Journeys In Science

#### ACIDS

(By Gordon H. Quest, M.A.)

Acids are important hydrogen compounds which when dissolved in water possess a sour taste. They also have the property of turning blue litmus, a dye extracted from certain lichens, red. A substance known as litmus, which undergoes a change in color upon the addition of an acid or alkali, is known as an indicator. Thus litmus is red in the presence of an acid and blue in the presence of an alkali.

The most common acids are sulphuric, hydrochloric, nitric, carbonic, and acetic. Acetic acid is the active part of vinegar, which has been used by man for thousands of years. Apples, lemons, grapefruit and other fruits owe their agreeable flavor, in part, to acids, such as malic, citric, and tartaric. Acids always contain the element hydrogen and often oxygen.

Hydrochloric acid gas may be prepared by pouring strong sulphuric acid upon salt. It is a very soluble gas and the solution is known as hydrochloric acid. This acid is used for the preparation of hydrogen and chlorine and for cleansing the surfaces of metals.

Concentrated sulphuric acid, or oil of vitriol, contains about 18 per cent. of water. When the strong acid is poured into water, an enormous quantity of heat is generated. Concentrated sulphuric acid has a great affinity for water, or for the elements which make up water, namely hydrogen and oxygen. Cane-sugar, for example, is a chemical compound composed of the elements carbon, hydrogen, and oxygen in chemical union; and when strong sulphuric acid is poured into a syrup of sugar, the sugar turns black and froths violently because the hydrogen and oxygen are taken from the sugar to form water, leaving black carbon.

Nearly all chemical industries use sulphuric acid and hence vast quantities of it are manufactured. Nitric acid when pure is a colorless liquid; the solution of nitric acid contains about 68 per cent. of the active substance and 32 per cent. of water. When the hydrochloric acid is mixed with hydrochloric acid a mixture known as aqua regia is produced. Aqua regia is the Latin for royal water and was given that name because it dissolves the noble metal gold. Nitric acid is used in the manufacture of explosives.

Carbonic acid is produced by bubbling carbon dioxide gas into water and is found naturally in mineral waters. Though it is a weak acid, which decomposes very readily, it plays an important role in certain processes which take place in nature. Thus it dissolves limestone, and gradually dissolves carbonate rocks to form caves.

### Earth May Blow Up

Surrounding Shell Being Gradually Melted By Internal Heat

Ord Dr. Bailey Willis, 78, of Palo Alto, who loves to scare the wits out of "seismophobes" Southern Californians, presented a picture of Earth's history and structure which disagrees with the long-accepted imagination. The Earth, Dr. Willis suggested, originally was an aggregation of cold substances which gravitation pulled into a tight little planetary mass somewhere between 50 million and two billion years ago. Ever since, radioactive elements in Earth's material have been long-range imaginations. The Earth's centre until to-day the core of Earth is a hot fluid mass of iron, nickel, radium and other heavy elements 4,000 miles in diameter surrounded by a rocky shell 2,000 miles thick. As ions pass, "the persistent release of atomic energy continues, and will continue to supply heat and melt the surrounding shell with the result that Mother Earth may eventually take her place among the stars."

Seeking a logical reason for the frequency of earthquakes along the shores of the Pacific, Dr. Benj. Gutenberg of Pasadena presented a thesis that the Pacific Ocean represents a vast area from which Earth has lost 20 miles of outside skin. That "raw spot" in Mother Earth's side promises to explain the true nature of Earth's disturbances, the crust's movements, eruptions, and extend along the edges of the skinless areas. We shall never be able to predict the day on which an earthquake will occur. But it is possible that we shall be able to set the date to within a year or so.—From Time.

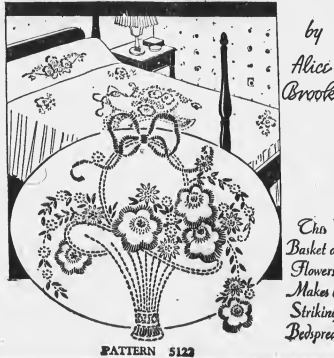

### Bread Made From Seaweed

Seaweed bread now has a modest sale along the Pacific slope. It's made from giant kelp plants that grow in profusion along the coast and contain iodine and other mineral considered beneficial. And while the bread has an odd flavor, its far from unpalatable.

Women pipers, it has been decided, are not eligible for membership of the London Scottish Piping Society, a body composed of bagpipe players and learners.

The earth travels 584,600,000 miles on its annual trip around the sun.

## Household Arts

PATTERN 5122

Now is the time to stock up on such things as bedspreads. And how effectively you can do this with this lovely basket design. It's made in the simplest stitches and grows quickly under your needle. Do it in the colors that will harmonize with your bedroom whether it's dainty or bold in coloring. If you wish scarfs and other lines to go with it, you will find matching motifs in Pattern 5125 which appeared some time ago.

In pattern 5122 you will find a transfer pattern of a basket 15 1/2 x 19 inches, a bolster motif 7 x 18 inches, and four corner motifs 4 1/2 x 5 1/2 inches; material requirements; color suggestions; and illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. W., Winnipeg.

There is no Alice Brooks pattern book published

## Alberta Provincial Elections, 1935 Rocky Mountain Constituency

I very respectfully solicit your vote in the approaching election.

I shall give my whole-hearted support to Mr. W. R. Howson, Leader of the Liberal party in Alberta in carrying out his policies, and particularly, when elected, I shall unceasingly work for:-

1. The extension of our markets for Alberta coal.
2. Improvement in both the living and working conditions of the miner.
3. The welfare of our young people in matters of education and vocational training.
4. A fairer and more equitable application of the provisions of The Workmen's Compensation Act.
5. The encouragement of tourist traffic to our parks and incomparable mountain scenery by the further improvement of our main highways.
6. Better market roads for our farmers throughout the Province.

## INTERESTING NEWS ITEMS OF PEOPLE YOU KNOW

Jimmy Yates returned Sunday from a visit to Vancouver.

Ann Appleton of Turner Valley is the guest of her aunt, Mrs. H. C. McBurney.

Miss Margaret Hanson, of Estevan, Sask., is visiting with Audrey Halliwell.

Mrs. Ed. Barnard and son, raser, are the guests of Mr. and Mrs. Wm. Fraser.

Mr. and Mrs. George Derbyshire left on Sunday for two weeks holiday trip to coast cities.

Mrs. J. H. Boulton is spending a holiday in Vancouver, having been there for the past few weeks.

F. O. McKenna, of Pincher Creek, Liberal candidate for the Federal constituency of Macleod, will hold a public meeting here in the near future.

Mr. and Mrs. J. Russell, Second street, returned on Tuesday from an enjoyable two weeks' vacation at Vancouver.

Permanent waving and marcelling appointments should be made by telephoning Miss Mary Gletta, number 42, Cabinet Beauty Parlor.

Eric Lamb, who recently took over The Eatery, opposite the Grand Union hotel, expects his wife to arrive here shortly.

Sam McDonald of Rossville, B.C., is visiting Mr. and Mrs. W. Bell at the Grand Union hotel. His son Jim, accompanied by his wife, motored down on Sunday.

Rev. A. S. and Mrs. Partington and Mary left on Monday for Nelson to spend the month of August. Services in St. Alban's church are cancelled during their absence.

Buy from our advertisers. They are good merchandisers and good citizens who strive to make Coleman bigger and better. Be loyal to your own community.

Earl Price returned last week from Edmonton, after several weeks in hospital. He is recovering nicely following amputation of his leg which was injured in the mine early this year.

James Ford, secretary-treasurer of the school district, states that current taxes are coming in very nicely, good collections being made last Saturday (pay day) and he hopes there will be equally good returns between now and next pay day.

Of interest to the Girl Guides throughout the Pass was the double victory of Miss Mary Sharkey in the senior and junior diving championships of Alberta held at Sylvan Lake last week. Miss Sharkey was swimming instructress at the Guide camp held at Rock Lake this year.

Gentleman Jack Jones of Coleman and Jack Tebo of Rossland are billed to fight on August 10 at Rossland, a ten-round contest. Several side bets totalling a considerable amount are being wagered on the result. Jack Jones is under the business management of Angelo Gentile.

The flower gardens at the town hall, tenderly cared for by William Burrows, present a very fine appearance. The peony plants donated by the Prince of Wales several years ago as a souvenir of his trans-Canada trip, have blossomed better than ever this year, one plant carrying 26 blooms of a gorgeous purple hue. The poplar trees, planted in remembrance of Coleman men killed in the war, are making rapid growth.

## THEY READ THE JOURNAL FOR THE NEWS

Returning from Vancouver, where she met many former Colemanites, Mrs. William Milley stated she was surprised to find they knew practically as much Coleman news as she could tell them, for they had read of the local happenings in The Journal, several copies being forwarded there to people formerly living here. "A.d. how we like to read of the old town!" they remarked to Mrs. Milley.

**CLASSIFIED ADVERTISEMENTS**  
5-ROOMED HOUSE with Garage, \$200 cash, balance \$20 monthly. Apply Journal Office, Phone 209.

**FOR SALE**—One Jersey cow, brown, cheap. Apply Journal office or John Ondik, West Coleman.

**FOR SALE**—Two-story frame building on Main street, good location for business; small garage. Cash or one-third cash, balance monthly as rent applied on purchase. Apply Journal office.

## THELMA WILLIAMS WINS MIS- SPILT WORD CONTEST

Putting the answers into a box, and after shaking up said the first to be taken out when opened was found to be that of Thelma Williams, whose name has been placed on The Journal's subscription list to receive the paper for one year. The word was Nectar, intentionally misspelled "Nector" in Rawleigh's advertisement.

One lady, among those who sent in replies, Mrs. J. Ankil stated: "Being a newcomer to Coleman I get a great kick from scanning these ads."

Mrs. Ganaria picked out the word Catsup in J. M. Allan's ad, stating it should have been "Ketchup". The trade name is "Catsup" although the meaning of the words is identical, according to Webster's dictionary. In any event it was not an intentional error.

Winifred Mitchell picked out a typographical error in Allan's ad, the word Purex being spelt "Purx".

Joyce Williams also picked out the same word in Allan's ad as Mrs. Ganaria, viz, Catsup.

Others sending in the correct answer were Blanche Higginbotham, Reggie McMullen, Mary Partington. The Journal urges them to again try, as there is nothing like persistency to help win.

Those who win a subscription may not be awarded another prize during the current year in which they won, but are urged to still send in replies, and a record will be kept of same.

It is a good way to exercise your vigilance to detect errors, and The Journal appreciates the interest of competitors and others who do not send in replies, but by their remarks indicate they take a good look through the ads, to find how many errors the newspapermen make.

## "PRESERVE THE FORESTS" SHOULD BE SLOGAN OF CAMPER AND FISHERMEN

While forest fires are apparently on the decrease in Alberta, there is need for constant vigilance on the part of campers and tourists in the foothill and mountain areas of the province, state provincial forestry officials in issuing their annual warning regarding fires. The season is now approaching when the utmost precaution is necessary to keep camp fires under control and prevent the start of fires that may destroy valuable timber resources and even endanger lives.

In a territory from Banff south to the U.S. border, and east from the B.C. boundary to the Calgary-Macleod line of the C.P.R., camp fires are absolutely prohibited between August 1st and December 1st unless by the use of satisfactory stoves. Those failing to observe this regulation are subject to prosecution and fine as well as to civil damages.

In 1934 there were 240 fires in the province, of which only 27 were what might be described as large fires. The total damage done by forest fires was estimated at \$126,000. There were two very large fires which destroyed much valuable timber and endangered lives, while costing the larger proportion of the money voted for fire fighting purposes, to combat them. These were the Castle River fire, which originated in Southern British Columbia and swept into Alberta territory, and the Cypress Hills fire. Both of these fires were traced to pure neglect and carelessness. Had it not been for these two fires, one of which originated in territory outside of provincial control, Alberta would have had in 1934 the best forest fire record in its history.

## CAR STOLEN AT MICHEL

B.C. provincial police sent in a warning to Coleman on Monday morning to look out for two men suspected of stealing a car from a garage in Michel early that morning. The car was abandoned near Crosses Nest through running short of gas.

## SHOWER FOR FORMER CHOIR MEMBER

A faithful member of St. Alban's choir, Mrs. Fred Weir, formerly Miss Annie Griffin, was the guest of honor at a shower in the parish hall on Saturday evening, when about 30 ladies gathered for a social evening at the invitation of Mrs. Martland, also a member of the choir. Whist was played, the prizes being won by Mrs. Walker, Williams, Mrs. Garrett and Miss Lottie Nicholas. The rector, Rev. A. E. Partington, gave a short

address following the serving of lunch, and amid much merriment the gift parcels were opened.

The bride was recently married to former Lieut. Weir, who came here as a Salvation Army officer, but who resigned on his marriage. The friends of the young couple join in wishing them the best of luck.

Mr. and Mrs. D. Nevay were Lethbridge visitors on Saturday.

Believe in Coleman; work for it; tell people it is the Best Town in the Pass—for it is!
